

DOMINATOR 680 FASHION LINE

Perfect balance between design innovation and modern style

Thanks to its rational use of space, this yacht offers the highest standards of comfort and design, while maintaining a sleek and elegant external profile. The Dominator 680 is a perfect balance between design innovation and modern style.

The living zone consists of a sofa area, a spacious dining area and a kitchen separated from the helm station by a stainless steel partition. The yacht's distinctive interior design is enhanced by contemporary forms and highly refined features, many of which can be customized.

Thanks to the boat's vast side windows, the main deck is splendidly bright and sunny, and the same care has been taken over the nocturnal lighting which is designed to create iridescent atmospheres by means of special rear-lit panels. On request, RGB illumination can also be installed in this system to match the boat's atmospheric exterior lighting. The lower deck features a VIP cabin in the bows, a guest cabin in the centre of the boat and a Master Suite including a spacious changing area, a king-size bed, a sofa, desk and bookcase, as well as a twin full beam bathroom with an ensuite marble and glass jacuzzi shower.
