

## **DOMINATOR 720**

### **Extraordinary design and space for the new generation Dominator**

Without a doubt, Dominator 720 has a considerable personality. The combination of **modern, captivating lines** with one of a kind solutions, aimed at lowering and **overcoming the barriers between interior and exterior space**. The **large interior areas** guarantee **excellent** on-board **liveability** and extreme **comfort** for both owners and their guests.

The external lines are remarkably clean, and characterised by linear, dynamic shapes, giving this yacht a sleek, racy line. The new style concept is a perfect combination between the typical aggressiveness of more sporty yachts, and the elegance of larger ones.

Another special quality of the exteriors of this Dominator is the extremely comfortable fly, featuring a large living area furnished with a table which can seat eight, a spacious bar island and comfortably sized sun deck.

The 720 is a flying bridge featuring highly spacious interiors, combining modern, dynamic lines with interior liveability at the very heights of her segment.

The spacious salon, designed with painstaking care to detail, differs from the competition thanks to the large, wide side window. Offering an extraordinary open view, the window means the interiors are extraordinarily well-lit, too, and gives the external broadside of the yacht an unmistakable outline.

The areas below deck are more than satisfactory in height, and offer the space and convenience for comfortably accommodating eight guests in four twin/double cabins, with windows offering charming and indeed thrilling views over the sea.

The style and quality of both the finishes and materials leave no doubt that one is aboard a last generation Dominator. Indeed, class and elegance are combined with prestigious materials and remarkable care taken over detail, in a balance between minimalism and modernity which intensifies the clean lines and beauty of the rooms. The lacquering of the wood, rear-lighting, valuable leather and a continuous colour play of shade on shade, give the yacht a unique, exclusive style. Not ostentatious in the slightest, this model never tires of enchanting those aboard.

In the master cabin, the brightness, guaranteed by the large panoramic "branchia" style windows, increases the perception of space, comparable with that of a longer yacht.

This model, as indeed all Dominator yachts, features a complex lighting project. A double scenario has been produced for each setting: one which with more "effect" for society events, and a softer, more relaxing one for family time.

Dominator's exclusiveness can be recognised in the valuable materials and extreme care for each and every detail, and in the clean lines and refined beauty of the various environments, all details which contribute to creating a unique atmosphere.

All this, without forgetting the special qualities which mark all the Dominator models: that they are **custom-made yachts**. In line with the shipyard's philosophy, the project for the new yacht has been studied from a strictly customised viewpoint, in order to offer clients an infinity of opportunities for personalising their yacht, according to their own tastes and requirements.
