

## **DOMINATOR 780**

### **Innovative design and surprisingly wide spaces for the new Dominator generation**

The **Dominator 780** is the first of a new yacht generation which sets a turn-about in the designing philosophy of the Yard. The Designers went all out in their work, on a strongly innovative path as regards the Dominator tradition, succeeding in combining various fundamental aspects for the success of a top level yacht: **modern and captivating lines, innovative and unique solutions**, aiming to reduce and overcome the barriers between internal and external spaces, **wide rooms and excellent living comfort** both inside and outside the yacht and on the flying bridge. All this, to concede moments of pure comfort to the ship-owner and to his guests.

The much **valued lateral glazed framework of the lounge** - which on the starboard side reaches down to the deck bridge - stands out amongst the adopted solutions, offering a spectacular view on the sea, whilst comfortably lying on a luxurious chaise longue. The wide opening on to the sea is made possible by the installation of a particular fibre glass structure, in replacement of the outer railings and in view of its length, it removes the sense of delimitation between the boat and the sea. The limit between inside and outside is therefore overcome: the yacht is no longer a closed environment, but a "fluid" space, which perfectly integrates itself with the surrounding environments.

Pushed by the very same idea of experiencing an intense contact with the surrounding nature, the Designers have also devised two wide horizontal window frames in the **ship-owner's cabin**, thus giving the possibility of **looking at the sea from both sides of the ship**

The bright windows and glass openings are a happy trait d'union between the **fearless lines of the external spaces** and the **style and elegance of the interiors**.

The external spaces of **Dominator 780** are really surprising, given the size of this boat: **the flying bridge is majestically wide** and in spite of the small crane and the tender astern, we have succeeded in keeping a large living area: an ample settee with a table for 8 people, a spacious sun deck and last, the inevitable mobile bar with relevant seats.

The sun bridge on the bow side presents itself with a comfortable and wide settee, placed in front of a sunbathing island, hiding within it a pleasant surprise: a relaxing Jacuzzi, which can be ordered on demand.

Amongst other available optional items, for all Dominator models, the removable stern bridge, an exclusive *must* for maximum relaxation on board.

The refined and modern ship-owner's cabin stands out for its generous spaces, the numerous comforts and, above all, for the unique atmosphere created by the knowledgeable employment of lighting features. It is fitted with a comfortable cabin wardrobe and two bathrooms, intercommunicating through a wide shower room.

The VIP cabin and the two Guest cabins are superb for their elegance and the sobriety of the furniture, optimally combined with space organization. Each cabin has its own private bathroom with the showers fitted with crystal doors.

In the lobby of the night area there is a wardrobe with shelves for linen and a fridge bar, for the purpose of allowing the crew to serve all cabins without disturbing the other guests.

Once again, Dominator exceeds expectations by proposing a yacht of the many distinction points, of which **elegance, luxury and exclusiveness** are only but a few. Warm and welcoming environments enriched with valuable finishing touches are associated with the innovative and streamlined design of the **Dominator 780**.

The Dominator class is recognizable by the valuable materials and the attentive care given to every detail, by the clear lines and the refined beauty of all areas.

The essence of the woods, the contrasts of the varnishes and the fine leathers create a unique and exclusive style, in a continuous play of shades and direct and indirect lights.

Without forgetting the prerogative that distinguishes the new **780**: it being a **custom-made yacht**. In line with the Dominator thought, the project of the new boat has been studied for a rigorously custom made point of view, in order to offer the possibility of modifying and personalise any of the details of the **780**, in accordance with individual taste and requirements.

#### *Technical Specifications*

Length overall	24,00 m
Maximum beam	6,05 m
Displacement	55 tons
Fuel tank capacity	7500 L
Fresh water tank capacity	1500 L
Engines	2 x MAN/MTU from 1360 hp to 1840 hp commonrail
Generator	2 x 22,5 kW
